**Tolls development**

Delphi Version: 10 Seattle
MySQL Version: 10.6.5

Default setting:

Database 'wktechnology';
DriverID := 'MySQL';
Password := '';
Protocol := '';
Server := '127.0.0.1';
Port := '3306';
UserName := 'root';

Heads up:
'Password without password';
It is mandatory to use 'libmysql.dll' together with .Exe;

If you are going to compile the application in the IDE, pay attention to Delphi's OutPut directory, which must be configured correctly.
default .\$(Platform)\$(Config)

Exact location of this configuration: 'Project' tab > 'Options' > 'Delphi Compiler'
